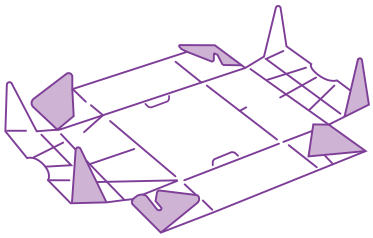
The Adjustable PackAll

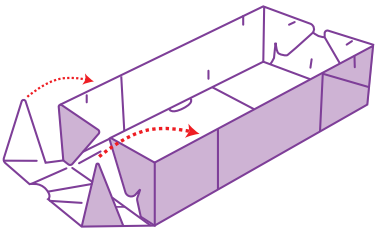
Great for deliveries and customer take outs!

This remarkable box was developed to enable florists to package practically all floral arrangements **safely, quickly, and neatly** with only two basic sizes, medium and large. Anyone can get the knack of using this amazing box with just a little practice by following the simple 2 or three steps shown in these diagrams. Your customers will certainly appreciate the difference when your arrangements arrive undamaged and you will save on **space, time, labor, and tissue paper.**

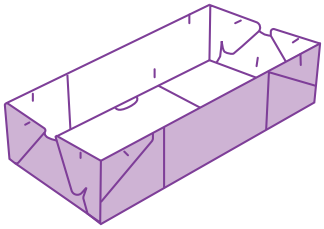
Shape #1: The Longfellow



Step 1: Break scores of all corner and triangular flaps, also the **low** creases of end panels as shown.

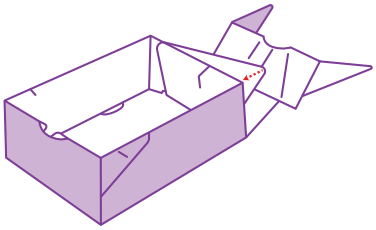


Step 2: Simply bring up corners straight and staple together on each side and ends.

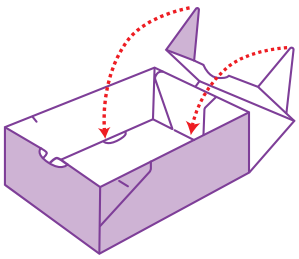


Finish: This strong utility box is used for centerpieces, long platners, dish gardens, etc. Medium size measures 15 x 7 x 3.5 and large is 19 x 9 x 4.5"

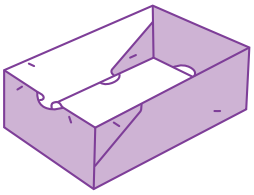
Shape #2: The Oblong



Step 1: Same procedure as Longfellow but **only on one end** – lock the other side and turn triangular flaps up as shown.

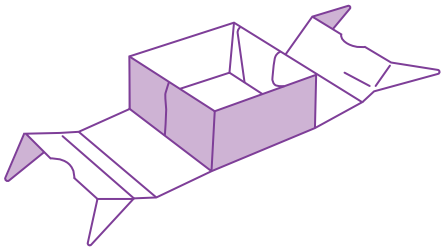


Step 2: Insert end panel with triangular flaps inside box and staple.

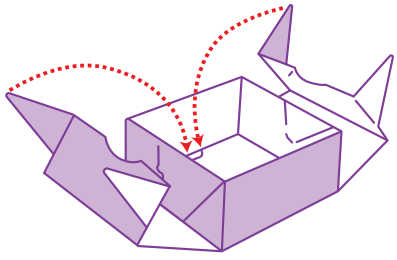


Finish: The shorter version of the Longfellow measures 11 x 7 x 3.5" in the medium and 14 x 9 x 4.5" in the large size.

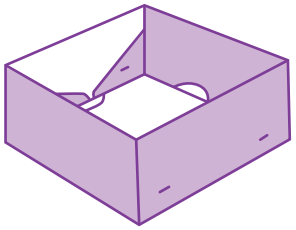
Shape #3: The Square



Step 1: Lock side panels as shown.

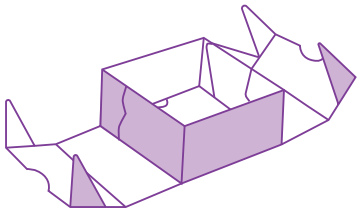


Step 2: Insert end panels with triangular flaps turned up inside of box and staple.

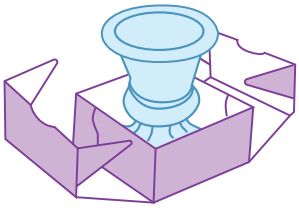


Finish: This heavy duty square box measures 7 x 7 x 3.5" in medium or 9 x 9 x 4.5" in large.

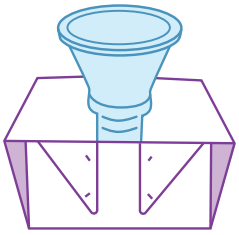
Shape #4: The Vise



Step 1: Lock side panels as shown.

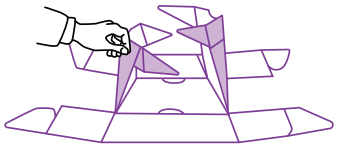


Step 2: Place any vase having a low neck in center of box.

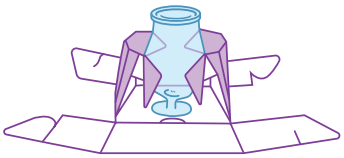


Finish: Close end panels with triangular flaps turned down and staple snugly through the top or through the openings at bottom (or both). A really fine package.

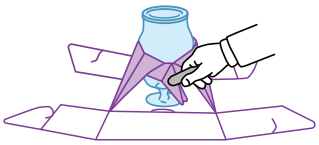
Shape #5: The Favorite



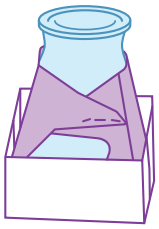
Step 1: Turn down collars with triangular flaps - squeeze and crush corrugated board, shape to follow contour of vase.



Step 2: Staple one pair of the traingular flaps well and then turn box around to face you again.

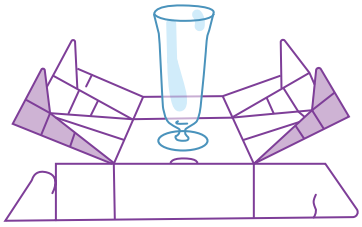


Step 3: Get both collars snugly around your vase and then staple remaining pair of triangular flaps as close to vase as possible and bend them over to each side

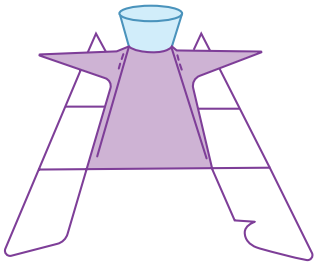


Finish: Bring up side panels and staple together and you have the safest and neatest package possible for all vases of medium height.

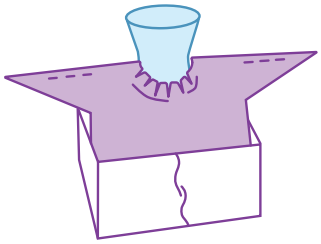
Shape #6: The Pyramid



Step 1: Break diagonal scores and place tall vase in center of box as shown.

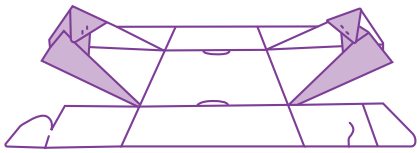


Step 2: Bring both end panels with triangular flaps snugly around tall vase and stape securely together, first one side then the other - always remembering to swing box with vase and flowers around to **face you.**

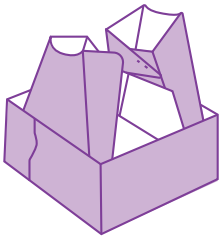


Finish: bring side panels up and lock together. There is absolutely no better way of packing a tall case than this winged pyramid shape.

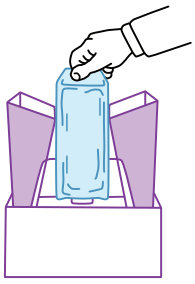
Shape #7: The Towers



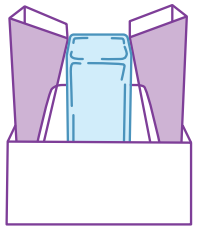
Step 1: Break diagonal scores and staple triangular flaps together.



Step 2: Raise diagonal panels upright inside box – lock side panels together.

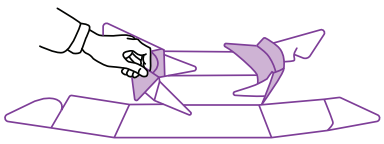


Step 3: Wedge block style vase between upright diagonal panels.



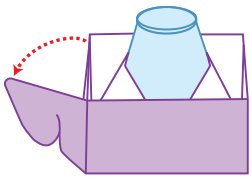
Finish: This shape is ideal **only for block type vases.**

Shape #8: The Lowboy

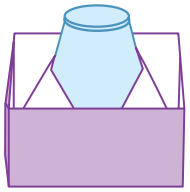


Step 1: Break lower scores of side panels and squeeze and crush corrugated board to follow shape as shown.

Step 2: Staple one path of the triangular flaps well and bend them over to one side either before or after placing vase in center of box.



Step 3: Lock side panels together.



Finish: This is an excellent shape for any small, low, or dainty arrangements – the inner part of the packer can fit oval, round, or square vases.
